Bike Safety Day

On Wednesday, K-6 students listened to a safety talk presented by Sergeant Presgrove. They learnt important things to remember when riding a bike, scooter or skateboard. Students who brought their bikes completed a practical course in our playground where they had to obey road signs. Thank you to Sunrise Cycles who donated some vouchers and bags. Some students won these prizes after they completed the course successfully.

Student of the Week – Gus S

Gus is a dedicated student who always tries his best. He is a kind and considerate class member who eagerly attempts any challenge presented to him. Gus consistently upholds our Three Key Values and can always be depended upon to encourage and support other students.

Congratulations Gus!

Which is healthier: Fresh, Frozen or Canned vegetables?

Buying your fresh vegetables in season means they are at their peak nutritional value and at their cheapest. It's important that they ARE fresh, though, because as the time they are stored increases, their nutrients decrease. Frozen vegetables have their nutrients locked in by the freezing process shortly after gathering, so they are a good option: steam or microwave in a little water for best results. Canned vegetables are a little less nutritious as the canning process affects heat sensitive vitamins EXCEPT for canned tomatoes where the antioxidants are made more available by the heat! Remember when using canned vegetables to get the low salt varieties. Whichever you use it's great that you're getting the important five serves a day for your family!
